e-Freight
CPS has some of the most advanced e-Freight services to let you easily create, retrieve and update an e-AWB.

CPS enables carriers to bring the advantages of e-Freight directly to you. With some carriers you can also print an IATA Cargo Receipt or universal air waybill on plain paper.

For more information, we recommend that you look at the e-Freight Guide.
e-Freight: Create / Modify MAWB

The Create / Retrieve MAWB page allows you to create, retrieve and update an electronic Master Air Waybill.

If you link to this page from a booking page, your booking details will show from the start, which saves a lot or rekeying.
